

Phasing, stakeholders, client demands, pilots: what is in it for you?

Martijn Veltkamp
SUREbridge project manager @ FiberCore Europe

<Date: 2016-05-27>

Phasing

Why you are part of SUREbridge

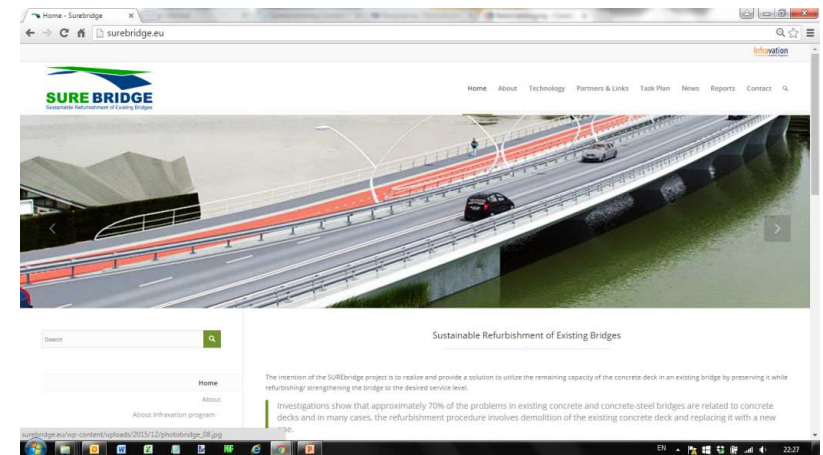

- While structural damage is generic, the best solution is context-specific
- To make SUREbridge a success, we need your input, your requirements, your expectations
- Sooner rather later: today we can still steer the project
- Innovation is best done together

SUREbridge for road-owners: what is in it for you?

How to do more than wait for the report in January 2018:

- Follow the project on our website: www.surebridge.eu
- Give input on client-demands through our questionnaire
- Attend follow-up meetings
- Raise your voice, today or later
- Propose a pilot-project with us

Doing a pilot-project with us?

SUREbridge includes testing and a case-study, but no pilots

A tailored pilot-project can however still be done:

- SUREbridge brings knowledge-input
- The bridge-owner brings the project
- Client and SUREbridge collaborate

Result:

- Faster start-up for the owner
- Faster and more practical knowledge on the SUREbridge-solution
- Win-win for both knowledge-development and the owner

Phasing, stakeholders, client demands,
pilots: what is in it for you?
